

Wood Trend

The eclectic nature of creative essence

Panaria
ceramica

**The beauty
of feeling
at home**

Time leaves its mark, creating the rules for a new aesthetic

Passion exceeds experience: with careful eyes and expert hands it transforms a wooden surface into a unique and high performance porcelain stoneware material that is ideal for conveying every space with style.

A single large size recreates the charm of old wood boards with a sophisticated worn effect, in 5 natural tones that connote warmth and harmony.

Through experience, I recreate the sense of tradition with a new spirit and new tastes

Nature is a cycle, from birth to growth to decay. We've imbued this philosophy into crafting Wood Trend collection to bring nature back into your life.

A creative style to be lived with simplicity

Substance and thought change the nature of a space,
they converse with it and open it up to imagination.

**Past and present:
the charm of tradition that
projects our experience
towards a dimension
of warmth and comfort**

A natural touch accompanies each day. With its captivating tones, even the flooring becomes a star on our own personal stage

**Natural, one-of-a-kind grains
with light and delicate colors
underscore eternal surfaces
of great charm**

A variety of textures and structures, as though produced in an artisan workshop, dress the space with a simple elegance

A pulsing and dynamic collection, permeated by its own natural harmony.

**Not just appearance, but
content. An intelligent and
original solution to give
strength and character
to social spaces**

PANARIA AND THE ENVIRONMENT

100% REUSE OF UNFIRED TILES

Crude waste generated by the process is reintegrated in the production cycle with no costs for the environment. This contributes to the safeguard of natural resources.

100% REUSE/RECYCLING OF THE INDUSTRIAL WASTE - FIRED TILES

The waste-fired tiles are fully reused in the production cycle. In addition, at the end of life, the tiles Panaria can be recycled as materials for substrates for roads and buildings, thus reducing the use of gravel and natural aggregates commonly used in building.

100% WATER RECYCLING

The water used in the production process is recycled. The water demand is strongly reduced by this mean.

100% OF NON CERAMIC WASTE

Is differentiated and recycled in other production cycles.

LOW EMISSIONS IN THE ATMOSPHERE

Panaria production plant strictly complies to US Standards with a very small amount of gas emissions in the atmosphere.

SAFETY REQUIREMENTS: NO FIRE REACTION

All of Panaria's ceramic tile products are Class A building materials as described in ASTM E84 - Standard Test Method for Surface Burning Characteristics of Building Materials. This is due to the flame spread rating of (0) and smoke developed rating of (0) falling within the ranges of a Class A material. Other building codes refer to this as a Type I material in accordance with NFPA 255.

PANARIA PACKING MATERIAL IS 100% RECYCLABLE

Carton boxes, plastic packaging materials, wooden pallets, straps, etc.

METHANE CONSUMPTION IS HIGHLY REDUCED

By the use of up to date technologies and customized installations.
